Fun For All Object of Celebration Committee

PLANS FOR BIG DAY GOING AHEAD AT RAPID PACE

The general committee in charge of the big celebration on July 1st in town are rapidly getting their plans in shape to give the large crowd looked for on that occasion the "time of their lives"; and indeed all Wainwright and district are expected to plan to be there.

All kinds of sports are being arranged, including baseball, softball (both ladies and gent's), basketball, horse shows, and in addition a nice race card has been prepared for the horse racing.

The grounds committee, under direction of Jimmy Robinson, are putting in lots of work to have things ship-shape for the day's affair and improvements are being made, too, at the entrance to the grounds.

Dr. Wallace has been given charge of the sports items, and he is arranging for help from such devotees as Verg. Nelson, Duke Ott, Hedley Abbott, Doug Wallace and W. H. Lyle.

The new time-table became effective on Sunday last and reads as follows:

Train No. 1 (westbound) will arrive at Wainwright at 3:15 a.m. and will leave at 3:25 a.m.

Train No. 2 (eastbound) will arrive at 12:15 a.m. and leave at 12:25 a.m.

There is no change in the time set for Nos. 3 and 4 (the Edmonton-Saskatoon local).

We are glad to learn that the little daughter of Mr. and Mrs. Wakefield, of Fabyan, who recently was injured when a horse she was riding fell on her and broke her leg, is progressing nicely now.

Mr. and Mrs. J. Robinson were visitors to the city during the past week.

Mr. and Mrs. Vining, of Edison, drove to town at the week-end and are visiting with Mr. and Mrs. Dick Mackay.

Train Times Show C.N. Flier Earlier

According to advices from headquarters, a slight change has been made in the local times for arrival and departure of the two "fliers" whereby both trains will be some few minutes earlier at this point.

The new time-table became effective on Sunday last and reads as follows:

Train No. 1 (westbound) will arrive at Wainwright at 3:15 a.m. and will leave at 3:25 a.m.

Train No. 2 (eastbound) will arrive at 12:15 a.m. and leave at 12:25 a.m.

There is no change in the time set for Nos. 3 and 4 (the Edmonton-Saskatoon local).

We are glad to learn that the little daughter of Mr. and Mrs. Wakefield, of Fabyan, who recently was injured when a horse she was riding fell on her and broke her leg, is progressing nicely now.

Mr. and Mrs. J. Robinson were visitors to the city during the past week.

Mr. and Mrs. Vining, of Edison, drove to town at the week-end and are visiting with Mr. and Mrs. Dick Mackay.

On the Fairway!

Tom Heathfield and Geo. Clark talk things over at the tourney on Sunday.

Farm Women Week Vermilion School

Farm women of the northern districts of Alberta will be interested to hear that the Farm Women's Week which has been held at the Vermilion School of Agriculture for the last several years, is being repeated this summer from July 4th to 8th.

This is a course specially designed for the benefit of farm mothers. The Schools of Agriculture realize that many farm women have little opportunity for a holiday from their numerous and exacting home duties, and it was with this idea in mind that the first Farm Women's Week was put on in 1930. The course has grown in popularity each year, and according to advance inquiries received at the school, a large registration is expected again this year.

The programme provides instruction in certain topics of Home Economics which will be of assistance to rural women. The work taken is essentially practical, being confined largely to helpful hints in cooking and sewing, with some attention being given also to such topics as poultry raising, horticulture, meat cutting, etc.

An important feature of the course is the opportunity it affords for a pleasant, profitable holiday for a few days on the beautiful school campus at Vermilion. Living accommodation is provided in the school dormitory at a nominal charge. Arrangements are made for the care of small children in case some mothers are obliged to take the baby with them. The entire week is planned with the object of providing as pleasant a holiday as possible, as well as a certain amount of useful information. Literature with further details of Farm Women's Week is provided by the school upon application.

Hospital Board Annual Meeting Held Saturday

Only a very small attendance marked the annual meeting of the trustee board of the Wainwright municipal hospital district which was held on Saturday last in the Town Hall.

At the outset Mr. J. Fisher, chairman of the board, gave a short report as follows: "The meeting today is being held in accordance with a resolution passed at the last annual meeting, in order to get a better time for year after more ratepayers to attend."

"During the past year the entire staff of the hospital has been changed, so that Miss Brown, the matron, has under her control Nurses Adams, Dumas, Myers and Shannon."

"Last year it was found necessary to make a number of improvements to both building and grounds. The main item was the laying out of a new sewage disposal field under the direction of the department of public health engineer at a cost of approximately \$500.00. It is pleasing to note that the new field worked perfectly during the past winter. Considerable interior decorating was done also and this has added greatly to the appearance of the hospital."

"At the beginning of this year, trouble was experienced with the x-ray machine, and it was finally decided to purchase a new one. This cost \$1,415.00 and was settled for by a 20 percent down payment with the balance spread over two years at 6 percent interest. The payments are being made monthly."

"The board regrets having to raise the regulations on the contributing areas but this was enforced through the almost negligible collection of accounts over the past few years."

Alberta Oil Fields Have Lowered Price

Crude oil produced in one field may and does influence the price of crude oil produced in another and if any evidence of it were needed, refer to the case of Alberta and Montana.

Before the tariff board, F. G. Cottle, chief auditor of the Alberta Board of Public Utilities Commissioners, showed how Montana production had affected the price on the Turner Valley output.

Montana oil cannot compete with Turner Valley in supplying Calgary refineries because Turner Valley is much nearer to Calgary and enjoys the advantage of lower transport costs. But Turner Valley is producing more crude than Calgary refineries can use and so has to ship part of its output east to refineries at Moose Jaw, Regina and Winnipeg.

Thus the price of the Turner Valley production in the field has to be at a level which will enable the crude to be laid down at these distant points (including freight) at prices which will be competitive with the prices at which Montana crude can be laid down. As Mr. Cottle pointed out, Montana crude cannot compete with Turner Valley crude at Calgary, but it can at other points.

Similarly Turner Valley crude actually affected the price of Montana crude right in Montana although it never got into that state in commercial quantities. Perhaps the issue in which the priorities are most interested, is that Turner Valley producers, the pipe lines, refineries and railways have adjusted their operations so that western consumers are able to buy their products at substantially lower prices than would have prevailed had the Alberta fields not been developed. Producers at the same time are getting a fair price for their output.

Board Will Build New Hi-School Unit

The regular meeting of the public school board was held June 7th, with all members present.

The minutes of the last regular and special meetings were adopted as read.

Principal Meade reported an enrolment of 96 in the high school for May; the school operated 21 days during that month. The report was accepted and filed.

The report from Principal Murray showed an enrolment of 164 in the public school for May. The musical festival and a games meet had been held during the month with the pupils doing very creditably at both affairs. All the year's work in the various grades had been completed, and the teachers were now reviewing in preparation for the annual examinations commencing June 10th. This report was also accepted and filed.

The finance committee reported bills and accounts amounting to \$1,244.05 and their recommendation for payment was adopted and cheques ordered to be drawn to cover the items.

The report of the attendance officer for May was filed and a copy ordered to be sent to the department for record.

The following motion was carried: "That the Board having received authority from the department to proceed with the building of a high school unit, that the Board now resolve to build, using (as far as it will go) the \$72,124.92 cash on hand as at December 1st, 1937, for this purpose, and that the Town Council be so notified."

This concluded the business and the meeting adjourned.

Musical Romance Stars Lily Pons

This musical romance, presented in the atmosphere of slapstick comedy, offers much for enthusiastic support of the public. In all phases the film has but one objective to provide the maximum amount of good music, airy romance and wholesome fun. "That Girl from Paris" points toward a good evening's entertainment for patrons of the Elite theatre next Thursday, Friday and Saturday.

The plot is simple and surprisingly human. Yet it's what is done to it, and how it is done, with smart directorial technique and clever acting, that endows the picture with its unusual entertainment and commercial quality.

In the yarn Lily Pons descends Gregory Gaye at the altar and becomes attached to Gene Raymond, Jack Oakie, Malscha Auer and Frank Jenks, members of a jazz band skydiving in Paris. Stowing away on a boat bearing the troubadours to America, she gets them in dutch with ship's officers and in further trouble with immigration officials, by hiding out in their apartment. Singing, music and comely intermingling Miss Pons becomes romantically interested in Raymond, but not in such a manner as to discourage lady's man Oakie.

A combination of fun and music for both the classes and the masses, "That Girl from Paris" is the kind of attraction that will not bore one's personal recommendation.

Mr. and Mrs. Eric Hoffmann and Mr. and Mrs. Jack Carroll spent a few days in Edmonton last week.

Death Has Called Another Old-Timer

On Sunday evening last, Mrs. Margaret Gehring passed peacefully away at her home at the age of 72 years.

The devoted lady, whose husband predeceased her some ten years ago, suffered two paralytic strokes on previous occasions, and a heart attack on Sunday proved fatal.

She was well-known among a large circle of acquaintances, having resided here for the past thirty years. Born at Cassel, Germany, she came with her parents to the States, and at a later date lived at Hardisty for a short time before coming with her husband to Wainwright.

She leaves to mourn her three sons (Fred in Springfield, Mass., August and Edward in town) and four daughters (Katie, of Calgary, Pauline, of Clyde, Emma, of Kevin, Mont., and Lillian in town) as well as a number of other relatives, to all of whom The Star extends sympathies in their bereavement.

The funeral is to be held this (Wed.) afternoon at St. Andrew's (Pres.) church with interment in Wainwright cemetery. Rev. W. S. Brooker will officiate.

Bible Society Begins Canvass

To commemorate the 40th year of service of the English Bible, a big celebration is being held in London, England, next week, and the local branch of the British and Foreign Bible Society feel that such a time would be most appropriate for their annual canvass.

The collections thus received are used toward the printing of the Bible in several different languages and placing it in the hands of the less fortunate.

In these collections, which began the week of June 19th, the Presbyterian church will be represented by Mr. A. Lilly, who will canvass 1st, 2nd and 3rd avenues; the Anglican church by Mrs. Hart and Mrs. Milner, taking 4th, 5th and 6th avenues; and the United Church by Mrs. Schmitt and Mrs. Knowles on 7th, 8th and 9th avenues.

School Term Nearing Finish

Entering the last leg of the school year, students at the public and high schools have started strenuous study sessions in preparation for the final examinations.

Teachers have completed curriculum courses and are now reviewing the year's work to aid those pupils who wish to write exams. Those who are taking Grade X will not be required to write.

COUNCIL WILL HOLIDAY DURING JULY & AUGUST

Following is a record of the proceedings of the council of the Town of Wainwright at its regular meeting on Tuesday, June 7th.

The members of council present at this meeting were Mayor Middlemas and Councillors Robinson, Billing, Welch, Lismore and Link.

The recorded proceedings of council at its regular meeting of May 17th were read and, on motion by Councillor Robinson, were adopted and confirmed as written.

On motion by Councillor Billing, a committee appointed by the L.O.B.A. were granted permission to hold a tag day within the Town of Wainwright in aid of the Protestant Children's Home in Edmonton; the date to be appointed by the society.

Notice was received from the department of old age pensions of the application of Mr. Archie Becket for a pension on account of blindness and, on motion by Councillor Robinson, his application was approved by council on the basis of full pension.

A petition, signed by a number of businessmen and largely signed by farmers of the district, requested that the Early Closing By-law be amended to allow the farming community more time for the transacting of business with local business places. Referred to the By-law Committee for consideration, on motion by Councillor Robinson.

Mr. Johan Hogstrom made written application for the use of Lot 8 in Block 39, Plan 9452, for gardening purposes in the year 1938 and, on motion by Councillor Welch, his application was approved.

On motion by Councillor Link, the unpaid portions in connection with relief for Mr. Harold McCallum was ordered filed.

Mr. E. Moore wrote council that all timber and posts of the Town of Wainwright had been returned from the sink site to the basement of the fire hall and, on motion by Councillor Welch, the communication was filed and payment of the balance of \$25.00 under the contract with Mr. Moore, authorized.

The application of the Wainwright Municipal Hospital District for the use of the council chamber for the holding of their ratepayers' meeting was referred to council and, on motion by Councillor Lismore, the use of the council chamber was granted to the hospital board for the payment of the usual fee of \$20.00.

On motion by Councillor Welch, the Secretary was instructed to write the Sports Union, requesting the removal of the fence on the south part of Block 21, Plan 6445V, on the ground that the fence as constructed is a public hazard.

The finance committee reported, recommending payment of accounts in a total of \$882.12, as follows:

Wainwright Gas Co., account.....	\$ 36.06
King's Printer.....	8.60
Workmen's Comp. Board, accident fund.....	31.30
Alta. Govt. Phones, acct.....	9.40
Registrar, Land Titles office.....	44.75
Earl L. Cork, delegation acct.....	9.65
Calgary Power Co., acct.....	157.20
Fred Sheffield, scavenging.....	125.00
Mrs. P. M. Christensen, care-taking.....	15.00
Harley Reville, salary.....	100.00
N. S. Kenny, salary.....	125.00
Atlas Lumber Co., account.....	2.25
Progress Lumber Co., acct.....	3.70
Wainwright Star, acct.....	28.75
Joe Wright, labor.....	6.60
J. McMurray, street maintenance.....	65.10
Beaver Soap & Chemicals, Ltd., chloride of lime.....	34.32
Wainwright Motors, acct.....	4.45
E. Moore, balance re skating rink.....	25.00
Province of Alberta, P. Yee account.....	50.00

On motion by Councillor Robinson, the report of the finance committee was received and accepted and the Mayor and Secretary-Treasurer were authorized and instructed to issue cheques in payment of all accounts included in the report in a total of \$882.12.

On motion by Councillor Robinson, council authorized a cash advance of \$25.00 to Mr. J. McMurray on account of labor; the balance to be applied on arrears of taxes. Mayor Middlemas recorded his vote as opposed to the advancing of this amount in cash.

The financial statement for the month of May was presented to the council.

(Continued on Page Four)

School Track Meet At Gilt Edge

Saturday, June 4th, saw a large crowd at Gilt Edge park when the following schools competed in the football tournament and track events, viz: Battle Creek, Gerald, Masco, Mayfield, Flaxtonville and White Cloud.

Mayfield was successful in winning the cup for football after a very close game with Battle Creek in the semi-final draw.

Flaxtonville won the cup for the school with highest points in track events. They had a total of 157; Mayfield was second with 89 points. (The other totals were: White Cloud, 45; Battle Creek, 43; Masco, 30; Gerald, 22; while the medal presented to the girl making most points went to Jean Black with a total of 26. Doug McNern, of Mayfield, was the boy medal winner with the same total.)

As a whole, the affair was voted a success, with a hope expressed that it will be continued annually.

Searle Precipitation Report No. Two

(Compiled from 182 rain gauge reports)

Taking into account the precipitation that occurred last autumn during the months of August, September and October, and the rains which have fallen this year from April 1st to June 4th inclusive, and weighting for wheat acreage, the moisture condition of Alberta, on June 4th, was 98 per cent of the normal as compared with 100 per cent for the previous week and 104 per cent for the week before that.

For Saskatchewan, on June 4th, the condition was 84 per cent, as compared with 95 per cent for the previous week and 86 per cent for the week before that.

For Manitoba, on June 4th, the condition was 86 per cent, normal as compared with 88 per cent for the previous week and 91 per cent for the week before that.

Taking the three Prairie Provinces as a unit, the weighted average on June 4th was 89 per cent of the normal, as compared with 96 per cent at the same time last week, 92 per cent for the week before that and 72 per cent on June 4th last year.

The present moisture deficiency as compared with normal, revealed by these figures, is not serious enough at this time to harm the growth of the wheat plant. It really means that the moisture reserves that the plants will begin to call upon about the end of June are somewhat less than normal. However, the existing deficiency can easily be made up in the next few weeks provided generous rains occur.

Edmonton Exhibition Jubilee Flashes

Edmonton's Sixtieth Exhibition opens July 18th, when sixty farm boys and girls will spend an enjoyable, educational week as guests in the Edmonton Exhibition Camp. Only new members are accepted annually; some will have applied, unsuccessfully, before the prize list, free on request, contains full information.

The prize list also gives details of the popular One-Farm Exhibits class, with \$120 in prizes for displays of products of the average home farm—grains, vegetables, cured or canned meats, etc. No farm gains everything, but exhibits winning 160 of the total of 400 points allowed, will qualify. Entries close July 2.

Mr. Bert Laird is spending a day or two with relatives in the city.

Wainwright Couple Wed in Vancouver

A quiet wedding took place at St. Mary's (Ang.) church, Vancouver, when Maude, youngest daughter of Mr. and Mrs. Anderson, of Victoria, B.C., became the bride of Mr. W. (Bill) J. Roberts, eldest son of Mr. and Mrs. R. J. A. Roberts, of Wainwright. Rev. A. M. Tremblé, former vicar of St. Thomas church, Wainwright, officiated.

"MEN AT WORK!"

The most cheerful sign on the road

"MEN AT WORK" is an encouraging, cheerful sign upon the highway. It is the happiest sign on the business highway too. Business enterprise, making wise use of banking service, is the mainspring of employment. The contractor responsible for that "Men at Work" sign gets the job of building that stretch of highway by being the lowest responsible tenderer.

Not always does he have the ready money to buy all the materials, pay wages and build it out of his own resources. He goes to the bank and, having assets and a good reputation, he negotiates such advances as he may need.

He orders materials, sets men to work. As the job proceeds, engineers' certificates enable him to collect from those with whom he contracted, and the work goes on.

The highway finished, the bank is repaid. Such repayments enable the bank to supply credit to other responsible borrowers.

A manufacturer gets a large order, with an early time limit for delivery. With only a hundred men, his factory cannot turn out the articles within the time required. With more men he can do it—but he lacks sufficient cash.

Operating his factory, as a going concern, with a profitable order and having a reputation for integrity, he asks the bank to lend him what he needs to pay wages.

The bank makes him a loan. He takes on more men. They get wages. The goods are turned out, delivered and paid for. The manufacturer repays the bank with the agreed interest.

He has his profit and can spend some money developing new business to keep his men employed.

How does a bank make these advances—where does the money come from?

Banks, having branches throughout Canada, mobilize the surplus funds of millions of depositors, large and small, and, based upon them, make credit available throughout the country as may be required.

Millions of little sums represent the toil, production and lifetime savings of Canadians—your fellow-citizens.

Safeguarding these deposits is the bank's first care.

Deposits of \$1,000 or less—most of them much less—are owned by 3,770,000 out of Canada's 4,084,000 savings depositors. The total of all bank savings deposits in Canada is nearly \$1,584,000,000; the average savings deposit in a bank is only \$387.

Wisely safeguarded by Canada's chartered banks these deposits furnish credit that keeps "men at work" when used by Canadian business and industry—producing new realizable

wealth from Canada's great resources. The country and all its people benefit.

In the field of business deposits, out of an average of 660,000 "current" accounts, 596,000 amount to \$1,000 or less.

Savings deposits are, primarily, the basis on which banks can make loans.

Only the confidence of the people and their willingness to leave their money on deposit, enable a bank to lend money and—at small profit-margin to itself—serve the community.

We have mentioned the contractor and the manufacturer. The same process stimulates employment throughout the whole fabric of production, industry and commerce.

Loans to agriculture and for marketing agricultural products totalled in 1937, \$38,294,000—9.0 per cent. of all ordinary bank loans shown on the return to the Minister of Finance, October 31st, 1937.

Of this sum \$57,490,000 went to farmers, cattlemen and fruit raisers and \$30,804,000 to grain dealers, seed merchants and grain exporters.

Other bank loans went to municipalities and school districts; wholesalers, retailers, manufacturers of and dealers in lumber, pulp and other forest products; fishermen; fish packers and curers; utility companies; stockbrokers and bond dealers; provincial governments; parishes; hospitals; and to charitable and religious institutions.

Canada's chartered banks defend and protect the safety of the savings of depositors—the millions of thrifty souls we have described, whose life-savings they entrust to their banks.

No Canadian depositor, even through the world-shaking events of recent years, has had to fear for the safety of a single dollar lodged with Canada's chartered banks.

The funds of depositors are their own—not a reservoir from which everybody may draw at will for any and every new financial experiment.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions, from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.

THE WAINWRIGHT FLOUR MILL

THE RAILWAY SITUATION

(By Hugh L. MacKinnon)

Unification or amalgamation is the product of the C.P.R. It is their spokesmen who proposed it and who are desperately urging it at the present time. Why?

The most able men in the world were selected for the Duff Commission, including railway experts of world experience; and the best information in the country was presented at great cost and carefully sifted. Why do C.P.R. men so urgently want the control of the government?

Let us examine the two roads from a standpoint of government assistance, and see if there is any great difference in the assistance given to the C.N.R. and the C.P.R.

We know that large capital sums of Canadian government funds have been invested in the C.N.R., but this money is invested and unification does not bring it back. Apart from this, the road earns an operating surplus now.

Last year, in a year of crop failure, it was \$17,607,700.00.

Before we accept this proposal of the C.P.R. let us list and examine some of the monies and favors we have extended the C.P.R. comparable to the investment in the government road.

(1) Before the C.P.R. was built, the Dominion Government of the day had put into the railway the sum of \$37,791,435.00. This was handed over to the C.P.R. without their paying anything for it.

(2) Land grants by the Dominion Government to the C.P.R. totalled 26,006,463 acres. A total of 6,800,000 of the above was relinquished for which the Dominion Government paid the C.P.R. \$10,138,210.00. In addition to this, the C.P.R. received over 10,500,000 acres of land from Provincial governments. In the C.P.R. annual report of 1934 a sum is mentioned of \$104,000,000.00 as having been received from the sale of lands, and in the C.P.R. annual report of 1931, the report owning 1,767,000 acres which they valued at \$59,216,000.00.

(3) The Dominion Government granted a cash subsidy of \$25,000,000 to the C.P.R. In addition subsidies were also paid to the Dominion Government to lines now operated under lease or owned by the C.P.R. amounting to \$27,885,088. Subsidies in the form of cash were made by provinces and municipalities to the companies now included in the Canadian Pacific system exceeding \$19,000,000.

(4) The C.P.R. were given relief from taxation. By statute (44 Vic, 1881) the capital stock of, and all property used for railway purposes by the C.P.R. "shall be forever free of taxation by the Dominion, or by any province hereafter to be established, or by a municipal corporation therein; and the lands of the Company, in the N.W. Territories, until they are sold or occupied, shall also be free from such taxation for twenty years after the grant thereof from the Crown."

Other aid granted to the Canadian Pacific, the value of which cannot be determined, consisted of the right to take public land free for railway purposes, admission of original construction material free of duty, and other concessions.

(5) The Government of Canada has favored the C.P.R. in giving them contracts for the carriage of the mails. From 1925 to 1937 inclusive the monies paid have been as follows:

1925	\$3,552,416
1926	3,697,036
1927	3,727,444
1928	3,715,032
1929	3,741,391
1930	3,693,153
1931	3,665,386
1932	3,621,875
1933	3,490,697
1934	3,519,697
1935	3,537,456
1936	3,584,823
1937	3,399,676

(6) They were granted rights to construct lines into territories already developed by the C.N.R. and fully serviced by them. The line into the Drumheller field which gave the C.N.R. 400 cars a day, now splits the business 200 cars to each road. Such lines as the branch lines into Tisdale, into Melville, into Prince Albert, into Lloydminster, etc., are other examples of how they have been favored.

As a matter of fact the Canadian Pacific duplicated many important lines of the Grand Trunk in eastern Canada, and took traffic away from that territory that was so important to the railway. For example, Woodstock to Windsor, Ontario, where for a distance of 140 miles the C.P.R. built a line parallel to the Grand Trunk, after the Grand Trunk had been serving the territory for 35 years.

It is quite evident that the contributions of the Dominion Government to the C.P.R. are very substantial, and that these fundamental basic services apparently cannot be self-supporting in a new country, especially in the case of Canada, where carrying rates are comparatively low and where population is sparse, and distances to be served great. We have spent large sums on canals, on harbors, and other basic services which were considered justifiable expense in the building of Canada, and our railways, both C.P.R. and C.N.R., are no exception except that in the case of the C.N.R. all monies paid out have been charged to capital account, and carried on year after year, the government paying out interest on monies spent and charging it to the C.N.R.

The record of the C.P.R. is not sufficiently better than the C.N.R. to justify our feeling that efficiency of the management is all on the part of the C.P.R. and especially so in the face of many favors granted the C.P.R. in the past, and at the same time the C.N.R. having been asked to take an attitude of government regarding employment, favoring the people as a whole because it was government owned, which policy is more constructive than the present proposed restriction of employment by unification.

In one of Sir Edward Beatty's recent speeches he said that under unification labor would not be seriously disturbed. In March 28th issue of *Time Magazine*, it is stated that "70¢ of every dollar saved" in railroad consolidations would come from savings on wages". In Canada it is generally accepted that approximately 60¢ of every railway dollar goes to labor.

How can Sir Edward justify his remarks under these circumstances? He says unification will save \$75,000,000. If 60¢ of each railway dollar goes to labor, this would figure out that 60% of \$75,000,000 would be \$45,000,000 and therefore this amount would be taken from labor. The average railway salary from top to bottom figures out at approximately \$1,500 per year. It is therefore not difficult to figure out that this would reduce railway employment in Canada by 30,000 employees.

The balance of the railway dollar, viz. 40% is used for purchase of materials, etc. which again involves many other forms of labor. The ramifications of this reduction would be so extensive, it would reach practically every industrial centre now existing.

In the face of the Duff Commission's recommendation of economies in management for both C.P.R. and the C.N.R., and in the face of the legislation empowering the railways to economize, we find the C.P.R. now spending enormous sums on radio speeches broadcast on most expensive hook-ups and printing these speeches and mailing them to almost everyone in business in Canada, and using the time of the chief executive, Sir Edward Beatty, to plan and promote this country-wide propaganda. It does not seem fitting that this is done, and one asks why. Is it the difficulties facing the C.P.R.? If so, then we should know it as such. It is not fair to come in the robes of utmost efficiency to ask for a great deal of money to control management, and not disclose the real situation.

In the last year of record a very substantial part of the C.P.R. surplus was in the funds received as majority owners of consolidated Smelters, which owned in the last year of record \$6,515,000 in dividends. This asset, of course, would not be part of unification.

Are the C.P.R. feeling large losses in having guaranteed bonds of subsidiary roads in the U.S.A.? A sum of \$80,000,000 has been named as the loss facing the C.P.R. for the Soo Line guarantee. If this is the position, should the people of Canada not be told, so that we would know the situation before going into a deal involving the country in such enormous obligations?

We have made the sacrifices to put into the C.N.R. the sums necessary to bring it to a high state of efficiency. It is an enormous system to manage. The C.P.R. is also a highly efficient railway and also very large. They are too large to operate as one with the hope of efficiency and economy. The only economies possible and good for the country at large can be done with the present legislation.

In Britain the government made regions and four railways serve these four regions, but that is very different from a large country like Canada with two railways now serving in most cases sparsely settled districts that cannot do without railway service, being cut down to one railway. Every body of public men which has studied the railway situation has come out strongly against unification or amalgamation, the Duff Commission being no exception. The mileage is too enormous to be operated economically by one management. So when no Commission, no Government, no intelligent body of public men which has studied the situation, can see any solution in unification or amalgamation, let us not be stampeded into it by C.P.R. propaganda.

Let us rather insist on two roads co-operating under the Duff legislation and cutting out unnecessary duplicating services where it is economical for the whole country.

Sir Walter Scott is said to have received \$1,500 for the novel "Ivanhoe". The book contained approximately 150,000 words.

JOHN E. PRICE COMPARES
LIFE WITH 100 YEARS AGO

We who are ever impatient for the dawn of an ever better and better day sometimes become too impatient. In this we are not unlike those who fill their petitions to the Almighty with requests for more and more blessings and who are not sufficiently grateful for blessings already received.

Whenever I catch myself in such a mood I stop and try to realize how grateful I should be that:

I haven't a toothache and if I did I could have it out practically painlessly.

If I had to have my gall bladder removed (as no doubt some of the neighbors wish I would) I wouldn't have to have it done on the kitchen table by lamp light with an amateur anesthetician.

Nor would I need to be bumped over curbstones in an old lumber wagon to a surgically unclean hospital.

On the contrary should I now need an operation I should be carried to an ambulance on a stretcher. In the ambulance I would rest on an air-cushioned mattress gliding along on air-wheels. At the hospital I would be whisked upstairs in an elevator and quickly whiffed into oblivion while the doctors did their cutting up or out. I would then be given some post operation dope to minimize the gas pains and many other things would

Potatoes have about four-fifths the water content.

Our Farm News Letter

Contributed by
B. Leslie Embley, C.D.A. (Glas.) F.C.S.

CARE OF LAWS

When the snow has gone in the spring and the ground has become firm, the lawn should be thoroughly combed out with a fine rake or stiff broom so that dead grass and other inert matter is removed. The reason for this is that the tender young grass shoots are easily smothered by such material. Any spots which have become infested with weeds should be cleaned out and bare patches left by this operation re-seeded.

The thin or bare areas in the lawn should be seeded right away with a suitable grass. Fortunately there are several grasses that are satisfactory over a wide range of soil and climatic conditions. Kentucky blue grass is the most suitable grass for ordinary lawns as it forms a sod which is very serviceable and long wearing, states A. M. Ross, Division of Forage Plants, Central Experimental Farm, Ottawa. For this reason it is used as a base for most lawn mixtures. Colonial bent is not a creeping bent and is therefore suitable for lawns. This grass is hardy in Canada and is generally useful for producing a fine dense sod which will persist both on ordinary lawns and also where close cutting is practised. Of all the bent grasses it requires the least water but needs considerably more care than Kentucky blue grass. Where a very fine lawn is desired colonial bent may be sown alone, but for general purposes this grass is recommended in a mixture with Kentucky blue, as this produces a sod which has the advantages of the blue grass, and is much denser due to the presence of the bent.

One of the best mixtures for general lawn use is made up in the following proportions: four Kentucky blue grass, one colonial bent and one-quarter of an ounce of white Dutch clover. The average person buying lawn grass seed cannot be expected to know the quality of the seed by general appearance, but the Department of Agriculture officially grades all the seed sold in Canada. The buyer should purchase nothing but the best seed, which is designated as Grade No. 1.

The lawn to be re-seeded should be worked into a fine seed bed and sown with the recommended mixture at the rate of three pounds per thousand square feet. A satisfactory method of getting an even distribution of seed is to divide the required amount of seed in half and sow the first half to sow the whole area, and the second half to go over it again, this time proceeding at right angles to the direction taken when sowing the first time. Covering may be done by lightly raking the seed into the earth or better still by covering it very lightly with screened soil. Ten pail of soil should cover an area of 1000 square feet of seeded surface, and a much better and even sowing will be obtained than by burying the seed deeply.

Lawn grass must have food if it is to grow normally. The seed should be supplied at small cost and should be applied just as soon as the raking and seeding has been done. There are on the market a number of ready mixed fertilizers, most of which will produce good results. It is important to apply fertilizer very evenly and at the rates specified on the containers. Satisfactory results cannot be expected by applying one pound where five pounds are recommended, and vice versa. As soon as the fertilizer has been applied it should be well watered in, care being taken to use a fine spray so that the seed is not dislodged in the newly seeded areas. New seedlings should be kept moist, but not flooded, for about two weeks to enable the grass to become well established.

Cutting should be regular and should start as soon as the grass is long enough to allow the mower to function properly. It is a mistake to let the grass grow over two inches long at any time. In cutting, it is advisable to use a grass catcher and remove all cuttings, which otherwise cause harm by forming a mat and thus smothering young shoots. Cuttings also help weeds to spread, as weed seeds are generally present in the cuttings and, if not removed, soon become established.

A FARMER LOOKS OVER HIS CROPS

The rush of the spring season over the farmer finds time to survey his growing crops and, comparing them with those of former years at this stage, may attempt to estimate what the harvest will be. On many a farm the unfertilized drill-ways in the fall wheat field is conspicuous by its inferiority but valuable as an object lesson. The farmer, too, who was persuaded to apply 0-16-6 fertilizer on his hay or pasture land last fall, now marks the excellent, more vigorous growth of the treated herbage and where the cows prefer to browse. Hundreds of farmers treated their seed grain this year, for the first time with the new improved organic mercury dust for smut control. Few, however, will have sown untreated seed

The World of Wheat

H. G. L. Strange,
Director, Research Department,
Searle Grain Company, Ltd.

"Wars and rumors of wars." This expression is as old as mankind, and is found in all languages.

Why do nations fight so much? The Research Department of the Searle Grain Company is now concluding a study which seems to show that certain inbred human characteristics or defects are perhaps mainly responsible.

1. The struggle for existence and the urge to improve living conditions.—Which makes countries take possession of other lands that grow more foodstuffs or produce more raw materials.

2. Selfishness.—Which makes countries that have an abundance of good things reluctant to share them freely with other nations.

3. Envy.—Which makes deficient nations determined to fight those countries that have taken possession of lands which produce an abundance. Is there any remedy for all these sad and distressing struggles? I, for the countries which possess most of the good things of this world make it easier, by lowering their tariffs, for the "have not" countries to obtain their reasonable needs of foods and raw materials all in exchange for their own goods.

This simple remedy I believe would lessen the necessity for war on the part of the "have not" countries, and besides which, would also be a decent fair and kindly thing to do.

Following factors have tended to lower price: War tension lessens—Private estimates U.S.A. winter wheat crop still higher. Increased wheat offerings by Russia at cheaper prices—Australian, Indian and American white Pacific wheats offered in volume—Russian crops in satisfactory condition; work ahead of last year.

SLAT'S DIARY

Friday: Well, it seemed as if this week never would come to a end but it did. I did not come out last in the test with we went threw this week. But they was even threw a bed of me. I don't expect pa would believe me if I told him they was one in the class which grades was less than mine was. I went told pa and ma that she was out 3 weeks with the measles. Roony Sells got 1st nonners. He is the kid who has his neck washed on week days. A big state.

Saturday: Went to a weener roast down at Blisseries house and walked home with Jane and when I was a telling her a story she began to yon on me. I got even with her though. I did not finish telling the story.

Sunday: While I was on my way to Sunday school the wind blowed Mr. Fudges hat off and I run and got it for him and he give me a nickel and so I put it in the collection. And saved my nickel. I tell the old saying in right. It is a ill wind that has no turning.

Monday: I am afraid teacher put a ketch question in are speeling pen today. She sed for us to define Bunter and I rote down it was sed Bunter you try to clean off yore teeth and cant without you go to yure dentist twice a yr. Jake says it means to swap things and etc.

Tuesday: Pa has been planning to spend his vacation in the mountains but today I heard ma tell Mrs. Ellen that they was a going to Canada when pa gets his vacation. I bet pa is going to be very much surprised when he hears that.

Wednesday: Well, pa has sent off for his seed which he wants to plant this spring. He is inditeded wither he wants the wheat crop back of the garage or over by the bird bath.

Thursday: I walked home with Jane this evening and I got a little sentimentile I guess. I sed they laset

nothing nicer than to be alone with the girl you like the best, and she says, 'Well go on and get with her and then the went in the house. Sum times I got a noshun to not pay her emny mind from now on. I wander just what she would do.

HEALTH

A HEALTH SERVICE OF
THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

HIGH BLOOD PRESSURE AND OVERWEIGHT

Blood pressure is one thing which is feared by many people approaching middle life. It is possible that some people do develop blood pressure from worry but that was not the trouble with Mr. X.

In September, 1931, Mr. X was 46 years of age. He believed that he should be examined every year by his doctor but for three years he had kept putting it off, partly because he was too busy and then he had been all right the last time he was examined. In those three years Mr. X had gained about twenty pounds in weight, mostly around his waist line. At last he got some free time and dropped in to have his doctor look him over. The doctor looked up his record and found that Mr. X had added four inches to his waistline. The examination also revealed that he had added about 30 points to his blood pressure. In other words, he had a blood pressure 30 points above normal for his age. His waist line was six inches larger than normal.

Now the medical profession knows that overweight and increased abdominal measurement are frequently factors in causing blood pressure to go up. They also know that, if the weight is brought down and the abdomen reduced in size, in the majority of cases of blood pressure a definite improvement will take place. Mr. X, like most people, was anxious to get his blood pressure back to normal if he could. His doctor explained that he should take moderate exercise, of which he had been taking little or none, and reduce the amount of food he had been taking. A proper diet was decided upon and some exercise given to reduce his waist line. It is a lot harder to reduce weight than it is to put it on, but Mr. X's doctor saw him from time to time and encouraged him to persevere in the good work.

In August, 1932, Mr. X went again to his doctor for an examination. His blood pressure was down a little, his weight was down about 10 pounds and waist line also reduced. He was examined again in June, 1933, and now he was beginning to reap the real reward. His weight was down another five pounds and his waist line was four inches smaller than in 1931, but the best part of it was that his blood pressure had returned to normal.

Mr. X continues to watch his diet and his waist line. He has a periodic health examination every year and has the satisfaction of knowing that his blood pressure continues to stay within normal limits.

No Wide Evasion

Income Taxes

According to the Hon. J. L. Lyle, minister of revenue in the federal parliament, the laws of Canada provide very effective stoppers to eight popular methods which have been in use by citizens of the United States in evading their income taxes.

As Mr. Lyle said on Thursday last: "Of course, there may be still some evasion, but I have no reason to think that this is at all widespread or very serious."

Mancy Harlow's HOME NEWS

In addition to black and plenty of navy blue — especially a dark, purplish shade — the prominent colors in hats for early summer are taupe tones, blond tortoise shell, burnt straw, natural beige, flax, tomato red and soft tints of washed blue, as well as tones of grayish blues on the slate side.

What is practically a lost art is preserved by manufacturers of buttons for the dress uniforms of officers in a number of British Army regiments. These buttons, which are made of nickel silver, are hand-worked with designs cut out with fine jewelers' saws. The filigree designs are said to be comparable to those worked on precious metals. Some of the saw blades are so fine that they are practically invisible.

The use of poisonous insect sprays by fruit growers has created

special equipment. It is not visible even on black materials, and does not harm the most delicate fabrics and colors which are not affected by water. Material treated with it have been tested and approved by the New York City Fire Department and many commercial laboratories.

Promotion in

Dept. of Agriculture

Promotion of J. R. Sweeney, provincial
deputy commissioner, to the position
of deputy minister of his department,
was announced on Friday by Hon. D. B. Mullen, minister of agriculture.
For the time being at least, Mr. Sweeney will carry on
with his duties as deputy commissioner.
As deputy minister he succeeds H. A. Craig, who recently was retired
from the service after 23 years as deputy minister.
During the recent absence on leave
of Mr. Craig and since his retirement
Mr. Sweeney has been filling the post
of deputy minister.

CONSTRUCTIVE
IMAGINATIONDoes your living room look the
same today as it did a month or so
ago? The chances are that it does
not.The one who created its present
atmosphere had to first imagine how the
things would look in their new
arrangement. Pianos, overstuffed
furniture and bookcases are heavy things.
A woman can't keep shoving them
about like pieces in a jigsaw puzzle
in order to see the effect they will
give in new relationships.The "seeing" must be done for the
pattern is set in her mind. When the
material is once created and "fixed"
there, it can be easily demonstrated
in a room set-up, with but few minor
changes.Similarly constructive imagination
or the lack of it, mark the difference
between success and failure in many
walks of life.An instance was recently brought
to our attention. A likable man of
considerable business ability failed in
a certain location. People were a bit
surprised when another man started
a similar business in the same store
room. It was the same store room,
but when he got through rearranging
it no one would recognize it as the
same store.For instance, he would have a mass
display near the door of some item he
was featuring. As a customer en-
tered she gave it a passing glance. As
she continued about the store she was
eventually brought face to face with
a similar display of the same item
two more times. In planning his floor
lay-out for the day the new owner
visualized his customers as going from
the grocery to the meat and to the
vegetable sections of the store. He
saw to it that each one was appealed
to by repetition and the form of the
display to pick up this particular item
and examine it. The plan price com-
pleted the sale in many instances.In some cases a thoughtful clerk escorting
a customer about the store managed
to stop in front of one of the displays.
Now, in his whole store lay-out and
in particular displays and also in the
selection of his clerks the new owner
had exercised constructive imagination.
To his constructive imaginings
he had added something plus. He
had added work and common sense
and artistry.Inventors, architects, teachers, car-
penters, cabinet makers, salesmen—
in fact, nearly everyone who does any-
thing just a little better than it has
been done before, achieves success
through better visualizing and better
execution in the world of those things
of the picture his mind sets up.Thinking is hard work, but the
more thoroughly it is done, the more
effective—and some strenuous—is the
physical work necessary to translate
it into tangible results.The woman who can't make her-
self visualize how a room will look in
a new arrangement will have to
strain herself to move the furniture
around.

STAND UP TO LIFE AND LIFT

(John Edwin Price)

When trials assail, you cannot stand
firm;

When foes attack, be brave.

Those can but test your strength of
soul

To ride life's roughest wave.

Do now the work cut out for you
With talents you've in store;Now whither, whine and fret because
God didn't give you more.To other's need, turn no deaf ear,
Be ready when they call you can;Not what we keep, but what we give
Is God's test of a man.The soul serene may sums inspire
Now crushed by many a loss;True motives high and pure—at work,
Relieve the heaviest cross.Farm Machinery
DemonstrationMonday afternoon last saw a big
gathering of farmers on the farm of Mr.
Geo. Boyd, north of town, the occasion
being the demonstration of Cockshutt
machinery by experts of the company
assisted by Guy Tott, the local agent.Drawn by a rubber-tired tractor,
the several machines seemed to make
light work of their job of farming,
this being especially the case with the
big tillage combine which seems to be
the coming implement for this territory.The operations of the machines
were described and explained, and al-
though the afternoon must have
proved a profitable one for those in
attendance.Mr. Tom Gotobed, with his wife and
family were in town from Viking last
week on a visit to friends and relatives.Mr. and Mrs. H. (Barney) Buckle
motored here from their home at Ed-
son last week end and were guests at
the home of Mrs. H. Brunner during
their stay.Notice of
Public Tender

To Lease for Fur Farming Purposes

Sealed tenders will be received by
the Director of Lands at Edmonton,
at 2 o'clock in the afternoon of Wed-
nesday, June 29th, 1938, to acquire a
Lease for Fur Farming purposes com-
prising the following lands: North
Half of Legal Subdivision 2; North
East Quarter of Legal Subdivision 3;
South East Quarter of Legal Sub-
division 6; All of Legal Subdivision 7;
and the South Half of Legal Sub-
division 10 of Section 21, in Twp-
ship 42, Range 3, West of the 4th
Meridian, comprising an area of ap-
proximately 101.1 acres, as provided
in the regulations governing the leasing
of areas of land, marsh and water
for fur farming purposes.All tenders must be submitted in
person at the time of sale on forms
obtainable for the purpose from the
Director of Lands at Edmonton.All tenders must state the amount
an acre per year the tenderer is pre-
pared to pay.The Lease fee \$10.00 and the first
year's rental must accompany the
tender.No Lease shall be issued at a rental
less than 25¢ an acre per annum for
the area of the land, marsh or water
described in the Lease.The Lease will be for a term of ten
years renewable at the discretion of
the Minister and will be awarded to
the person tendering the highest
amount an acre per year as rental.The Lease will be subject to the
Lease obtaining from the Depart-
ment of Agriculture a license or per-
mit to operate a fur farm on such
land marsh or water.Dated at Edmonton, this 2nd day of
June, 1938.J. W. STAFFORD,
Director of Lands,
22-5 Department of Lands and Mines

NOTICE

F. JOHNS, Secretary,
Star Office, Wainwright.MAKING CANADA
A Better Place in Which to LiveA Series of Letters from Distinguished Canadians on Vital Problems
Affecting the Future Welfare of Canada

Specially Written for Canadian Weekly Newspapers Association

Letter No. 10

Dear Mr. Jansen:

I may say that I am greatly inter-
ested in your project, for one reason,
because I believe that your Association
can do much to improve the wel-
fare of the Canadian people by the
influence it has in making public
opinion. The hard times of recent
years have led to a great deal of mis-
understanding and, in turn, have
spread some dangerous philosophies
which have interfered with the natu-
ral process of economic recovery. In
my opinion we need for the comple-
tion of this recovery not only a re-
turn to good crop conditions in the
Prairie Provinces, but also strong re-
sistance against the radical ideas
which have become all too prevalent
in the past seven or eight years. So
long as a spirit of independence and
a belief in democratic policies and
methods obtain throughout rural Can-
ada, we are in no serious danger of
taking such desperate measures as
have been introduced in certain other
countries, partly to relieve economic
distress, and partly to satisfy the
dictatorial aims and ambitions of men
who consider themselves superhuman.At present I can think of nothing
more important than that the tradi-
tional independence and democratic
beliefs of our rural population be
maintained, and I am sure that yourAssociation has done, and could do a
great deal more, to keep, and per-
haps strengthen these beliefs.I should welcome the opportunity
of discussing this matter further with
you. Perhaps you could find it con-
venient to visit Toronto in the near
future and call on me here.Yours very truly,
S. H. LOGAN,Past President, The Canadian
Bankers' Association.
President, Canadian Bank of
Commerce.CONTINUATION OF
School Board Meet

(Continued from page one)

The increase was a ten per cent.

Those present then elected Mr. F. M.

Ford as chairman for the meeting,

with Mr. H. U. Taylor as secretary.

After the minutes of the last an-
nual meeting had been read, Mr. J. W.
Stuart, secretary of the hospital board,
read the annual financial statement
and auditor's report which was adopt-
ed by the meeting.In the general discussion which fol-
lowed, Trustees Gould explained in an-
swer to a question, that there was
practically no difference in the num-
ber of patients from Vale area since
they had adopted free hospitalization
there. Quite some argument took
place regarding the liability of the
hospital taking patients without de-
manding a deposit, and it was pointed
out that although a deposit was
sought in each case, some of the pa-
tients were absolutely unable to pay
this, while in some cases the patients
were emergent and others indigent.Mr. Stuart pointed out that so far
as bad collections was concerned, the
delinquents were about "fifty-fifty"
town and country.In attempting to place responsibil-
ity for some of the outstanding ac-
counts, the sections of the Hospitals
Act dealing with the point were read
but no decision could be arrived at as
to proper transaction of these sections.The matter of the need of a proper
provision for infectious diseases was
brought up, but it was shown that
lack of funds to carry on even the
service of the present hospital unless
more collections were made would pro-
hibit the Board from attempting to do
anything along that line at present.Trustee Puller in a short explana-
tion stated that the matter of out-
standing accounts was being gone in-
to very thoroughly, and he thought
some action could be expected in the
near future.

The meeting then adjourned.

THOUGHTLESSNESS
IS REAL DANGERWhen you consider the millions of
flies that may be bred if even one
single female house-fly is allowed to
mature, it is obvious to what extent
these carriers of typhoid and other
disease germs are a menace to any
community where they are permitted
to multiply.Flies are no respecters of persons.
The baby in the millionaire's home or
the workman's cottage are equally in
danger if proper care is not exercised
to keep flies from entering the home.Flies frequent the filthiest feeding
places about the home, then, if al-
lowed inside, carry dangerous germs
to feeding bottles, liquids, foods, ev-
erything that is left exposed.The important point then is to
clean-up thoroughly wherever poten-
tial breeding places exist out-of-doors
around the house. And, to make
doubly sure, screen all windows and
doors and cover all milk and food
wherever exposed. If these precau-
tions were followed by everybody, it
would go a long way to solve the fly
problem. But we are most of us apt
to be thoughtless of others, perhaps,
and so the flies have a new lease on
life.If flies do get into your home, a
clean quick way to kill them as they
come is to place fly traps in conven-
ient places around the house till fly-
time is definitely over. Just a little
care and thoughtfulness for the other
fellow is the way to make the health
authorities' dream of a flyless com-
munity come true.We learn that several of the mer-
chants are now busy planning their
floats for the big parade on July 1st.BUCK JONES
MAKES NEW SERIESIn 1936, when his starring vehicles
were released through Universal, Buck
Jones was established in fame's annual
poll of exhibitors as the No. 1 west-
ern star at the box-office. He since
embarked upon a new production
company, Coronet Pictures, Inc.,
which will release his starring ve-
hicles through Columbia. "Hollywood
Round-Up" is the first of the series.

With Jones in the cast are Helen

21 FEET OF DISK

2 GALLONS PER HOUR

Hook onto a 21-foot disk and the acres roll by in quick order with the "Caterpillar" track-type tractor. When its heavy-duty power and result-getting traction go into action, there's going to be work done—and work done fast! In fact, the only thing that doesn't move fast is the fuel—2 gallons an hour is all that's used for the job shown above. And with the Diesel models, fuel savings of \$300 to \$500 a year are common everywhere!

Enquire About the New Low Price Of the "Caterpillar" Model 22

This is the world's most popular 25 H.P. track-type tractor and at the New Price, the lowest in history, it is the world's greatest tractor by today.

AMONG THE OLD-TIMERS

"REMINISCENCES OF OTHER DAYS"

TWENTY YEARS AGO

Mr. Aykroyd, who farms a few miles out of town, brought into the Star office a twig from an apple tree which he grew on his property. The blossoms had fallen and they apples were formed. With suitable weather the grover expected a fine crop of apples in the fall.

Miss Lillian Pedernold accepted a position in the local telephone exchange.

Mrs. Steel arrived from Edmonton to join her husband and make her home here. Mr. Steel being employed with Beauty and Co.

Several Edgerton men, including B. Hunt, Albert Appleby, Thomas Bazley, Chris Otterholm, W. J. Smithson and Richard Vanstone, went west to B.C. to look for fresh grazing land for their cattle. The land in this district was recently sold to such an extent that there was not sufficient land for grazing.

Mr. L. W. Crawford, of Calgary, arrived in Edgerton to take up his duties as accountant at the Merchants' Bank. Miss Powers replaced Miss Helen Mitchell in the same institution.

HOPE VALLEY

The dance at Glies on June 3rd was a huge success, the surrounding districts all being well represented.

Mr. Bob Snider, of the Saddle Hill district, was a recent patient at the Wainwright hospital, but we are pleased to hear he is coming along quite nicely after his operation for appendicitis.

A joint meeting of the McCafferty, Sunnyside and Hope Valley J.U.F.A. locals was held on Sunday, June 5th, at the home of Mr. and Mrs. Bill Reynolds of Sligo. Mr. and Mrs. Harry Spencer attended the meeting. Arrangements were started for the summer camp, which is to be held from July 4th to 11th at the east end of Clear Lake.

The Hope Valley sports picnic is to be held on Friday, July 15th, at the club's sports ground, with a big dance at Glies school in the evening. Fifty per cent. of the gate money goes towards softball prizes and the rest to the horsehoe tournament and races.

SYDENHAM

The men have been busy putting in their time on the road work during the past week.

Donnie McKay spent the week end with his relatives on the farm.

On Thursday, Robert Croteau entertained a number of his small friends, the occasion being his 7th birthday.

A number of young people gathered at the school house on Thursday for a practice ball game. They hope for another game next Thursday evening June 16th.

Mrs. C. Church was visiting on Friday at the home of Mrs. C. M. Alexander.

Rain is needed in this district to bring along crops and gardens. A light rain fell in the early part of the week, which helped some.

The house of the king of Uganda, at Kampala, has a fire burning at its entrance which is permitted to die out only when a king of the country dies.

TEN YEARS AGO

Mr. W. Blasen had the misfortune to be kicked by a horse last week, with the result that he was laid up with a broken leg.

Nine carloads of buffalo left on Monday for their new home in the north accompanied by Mr. A. S. MacLellan.

Miss Ma Reich was taken to Edmonton, where she underwent an operation for appendicitis.

The addition to the premises of the Wainwright Pharmacy was completed last week and made quite a nice improvement to the business section of the town.

Rev. A. M. Tremblay, the new pastor of St. Thomas (Ang.) church, arrived from London, England, on Thursday evening to take over his duties.

Mr. F. Tovey moved his family to the farm south of town, recently in the hands of Mr. Cline.

The first hail storm of the season visited Wainwright district Friday of last week. The storm lasted about 20 minutes but little damage was done, as the crops were not quite far enough advanced to be injured.

Mr. Norm. King has established a dandy auto camp on his property at Fabian.

The Calgary Power Company's surveyors were busy for the past couple of weeks laying out plans for the high tension lines west of town.

Little "Chubby" Wilson, son of Mr. and Mrs. Del Wilson, north of town, chopped off a large portion of his finger while chopping wood.

Mrs. Dina Elizabeth Mills, relict of the late R. J. Mills, passed away at the home of her son, Hartman, on Tuesday afternoon, following a stroke the previous day. She was in her 73rd year.

Lightning struck the home of Mr. Gene Tovey during the storm last week but being intercepted by the radio wires did no more damage other than burn up the batteries.

North Edgerton

Messrs M. Fraser and G. Keelior reported on Saturday that they put out grasshopper poison totaling one thousand pounds. Using wagons they broadcast this poison. Mr. Fraser claims he had 15 acres of grain spoiled by the pests. Well, Murdo, it takes a grasshopper to take a Scotman, it seems.

We notice with interest the smiles of contentment the farmers are showing since last Wednesday, when we had that wonderful rain. Quite a change from the last two summers (their faces, I mean). Now they are all looking onward to harvest, like a Paul Bunster.

Are our councillors asleep at the switch these days? Due to so much work with the grasshoppers, the roads seem to be going to the dogs.

Mr. J. C. Cornfield, we learn, had a mix-up and runaway last week while out harrowing his land. Apart from a few bruises, Jack is smiling again. It takes a lot to make happy Jack sad.

Mr. M. Donnelly, we notice, has six different kinds of seed oats planted in his garden, among them two new hullless kinds. There's nothing like trying them out, Morley.

IN MEMORIAM

In loving memory of Mr. Edward Monaghan, who passed away on June 14th, 1935. Ever remembered.
Sometimes I wonder as time goes

Oh, how often we ponder,
And always give a sigh for him
Who has left us and gone
To his reward on high.

I know he is peacefully waiting
For us to be with him.

Eye and bye,
—His Loving Wife and Daughter.

During the past week, Mel Dixon bought Joe Welch's Ford sedan, and Joe is now driving his new Chev. car.

We understand that the Town Fathers are bringing in a load of grasshopper poison by way of a treat for the pests which might settle in town!

Mrs. A. O. Lassell, and her sister Mrs. E. Kent, from Seattle, Wash., are here on a visit to Mr. and Mrs. Earl Cork for a short holiday.

HEATH

Mr. Colin Dixon and Mel Dixon motored to Edmonton to see their sister, who is ill there.

Mrs. Gripp left on Tuesday for her home at Oyen.

St. Patrick's W.A. were forced to postpone their garden party until Wednesday, June 15.

Warm weather has drawn a number of people to the lakes and they are finding good sport at fishing.

Mrs. Fred Lowe has returned home after spending some time in Toronto, attending her sister who has been very ill.

Sheepskin Flats

We are sorry to say that Mr. M. Templeton has been on the sick list lately with a badly infected nose.

Miss Janet Christian is working at the home of Mrs. C. Mallard.

Mrs. Jones Myer spent Friday last visiting Mrs. M. Templeton.

Mr. W. L. Malcolm spent the week end at the home of Mr. and Mrs. J. Wilkinson.

Mrs. J. Wilkinson entertained a few of her relations from Edgerton on Sunday last.

Hail Insurance

S. C. HECKBERT, Secy.-Mgr.

"Up in the Clouds"

by Beulah Earle

But Natalie knew what he came to say and perhaps Sunny knew as well. For nothing else could have sent him to them in such haste.

"Monty safe," Natalie cried out. "Is that it, Jimmy?"

He nodded his head, gasping. And then the two seized him and pummeled him till he actually could not get the words out.

"Just like Jimmy Matern," he sobbed out presently. "He was down twelve days before he could get word out. Some little place in Siberia. The Russians flew over twice hunting for him but he couldn't make them see him."

Strength surged into Natalie like a miracle. Sunny forgot herself and danced so madly that they thought she would hurl herself from the rock in her ecstasy.

Then they were all three running for Jimmy's car and Jimmy drove them straight to the flying field.

There the news was pouring in. Monty himself stood at the elbow of one of those short-wave operators on the other side of the world. He had fought his way through the wilderness sometimes afoot, sometimes in a peasant's wagon, at last in a puffing Russian train with no one aboard who could speak a word of English.

He had reached the Siberian control and had flashed the story of his safety. He was there now letting the world know, and Natalie, piecing together the bits that came from the humming receivers through the lips of one small radio operator, was writing the big account of her life.

Mack Hanlon was rushing out an extra at the other end of the telephone. Jimmy had flashed him before he raced to tell Sunny. He had tried to call Natalie but could get no answer. Now he was reading Natalie's story, line by line, to Hanlon.

Mont Wallace would complete his flight and try again at once for the non-stop honors, the story read. Jabe Marion had issued orders that the flight organization was to remain intact for the second trial.

Natalie finished her story and made Jimmy take her to the office.

"I don't want any more vacation," she told Hanlon as the shouts of the newsboys announced the extra on the street. "I want to handle the yarn from now till the second flight is over."

Hanlon was like a pleased child. "What I ought to do," he laughed, "is to send you along with this bird. These flights are harder on you than they are on him."

Natalie could laugh at that. There were few secrets between her and the weakened little city editor.

She went to find Jimmy in the photographer's den. He was stooping about in the dark-room with his eerie red light.

"Wait a minute," he yelled at her knock. Then he opened the door and she stood beside him under the red light while he worked.

"I thought you were supposed to be laid up," he chuckled as he rubbed the tips of his fingers over a weak spot in one of his negatives. "I guess there wasn't anything the matter with you that Dr. Mont Wallace couldn't cure."

"Gosh, Jimmy," she girl responded. "You don't suppose I'm crazy or anything, do you? How can anybody be like that who is in her right mind?"

The boy grinned at her in that eerie glow.

"You and I ought to know, kid," he said. "That love makes plain insanity look foolish."

He went on with his work for a few minutes in silence. Then he said, "How come you and Sunny Marion got so ticked up there on that rock?"

"I thought you hadn't been seeing much of each other."

"Oh, that's just some more of the craziness. She's got it too, poor kid. I wonder sometimes if she hasn't got it the worst of any of us all."

"Don't worry about her, Hal," Jimmy rejoined. "She'll take care of herself. She forgets quicky."

"That's just it, Jimmy, I think."

"That's pure genius, if you ask me. Come on. Let's go somewhere and try forgetting."

It had been so long since she and Jimmy had spent an evening together that the girl was surprised at the invitation. There was no sign that she could find during that evening that

Monty himself stood at the elbow of the short-wave operator.

Jimmy remembered at all his love for Natalie Wade.

It was an evening she was to recall afterward, an evening she often wondered about.

There was a delay of two days before Mont resumed his flight. He clicked it off then in amazing fashion station after station reported him. Each time the refueling was a success. Each time he made the next control almost exactly on schedule.

It was as though the elements having done their worst and failed to put him out of the running had now given up and were willing to let him come through.

When it was clear that he would finish easily, Natalie and Jimmy

doubt, had taken Mont's words as an offer of marriage on their night together. Mont had been caught in the trap of her apartment naïveté.

Suddenly then Nat realized that she too had been caught. Nothing she could say or do would make any difference. Mont was equally helpless, and if what she suspected was true, there might be desperation behind Sunny's haste.

Natalie caught Mont's hand in hers and clung to it. But her eyes avoided his face, fearing what they might find there. Maybe it was all true. Maybe Mont had meant only that he could not marry Natalie. Maybe he had willingly been drawn into this engagement with Sunny Marion.

PICOBAC PIPE TOBACCO FOR A MILD, COOL SMOKE

started East with the Marions to meet him. The girl reporter felt as though her heart would burst when she saw him again. But she hung to her self-control as well as she could and managed to make the trip without revealing the tumult within her.

Sunny Marion had a new bearing now. That seeming triumph was gone but in its stead had come a quiet determination.

Their own pilot had miscalculated the speed Mont would make. It was a race at last to see who would get in first at Mincola and scarcely had their trimotor stopped rolling when the black ship, a little battered and worse for wear, swooped downward.

It was then that Natalie's knees almost buckled under her. Jimmy and Sunny raced on ahead to gather him into their arms. Natalie came after with Jabe Marion.

For her amazement, Sunny faced her with Mont, her arm about him and his thrown across her shoulder.

"Congratulations, my people," she was saying. "Mont and I are going to be married."

Mont turned quickly and looked down into Sunny's face. Clearly he had not expected so early an announcement but he grinned when he looked up again and gripped Jabe Marion's hand as the older man sprang forward.

Natalie was surprised at her own reaction. She thought she knew now what Sunny had meant when she had spoken of cheating. The girl, no

Mont Wallace and the Marions were deep in plans for the second flight. "Don't need a little rest in that until it was accomplished, for failure made no heroes for the front page. Monty had been a spectacular figure on his return, but only because of his return from the dead. His romance had kept the page open to him for another day, but after that there were more thrilling stories than his own preoccupation with work, his hours spent on the plane and on the revision of the flight organization.

Natalie herself was writing a new series of features and found herself engrossed.

Life was returning to its old round. Even Mack Hanlon was little interested in the story of the new flight attempt.

But at last the day of the take-off came.

The plans had been changed now. The start was to be made from the home airport. New York was only one of the refueling stops. The last leg of the flight would be down the coast from Nome.

Before dawn they were at the field. Jimmy was there with his flashlights going to record the new scene and the altered plane.

And Sunny Marion was there. It was the first time Natalie had seen her in weeks. The change in her appearance shocked the older girl. It was not possible that this was the golden beauty of a few weeks before.

The plane had been trundled out to the runway. Its motor was turning briskly. The clockers were in their own places. Grease monkeys swarmed about. And because it was the first start of an international flight from the small port, there was a goodly crowd of curious onlookers.

Natalie moved through the crowd for a sight of Mont. At last she found him talking with Jabe Marion and the little radio operator. She joined the small party and stood at Mont's side.

"Good luck and success this time, boy," she spoke in a low tone. "I've got a bet right on your nose."

Hints for the Household

Conducted By Betty Barclay

SUMMER SALAD LOAF

2 tablespoons gelatine
1/2 cup cold water
2 cups tomato soup
1/4 cup cold meat, diced
1 cup peas, drained

Such was their greeting. Such was Natalie's meeting with the man she loved after the agony of three weeks. But the joy of seeing him, of having him near, kept her from being cast down. It was not till she was alone that night that she gave way to a torrent of tears.

They had gone to the Rembrandt Hotel in New York for the night. Natalie had done her own story and had listened while Mont talked with the other newspaper reporters. She had no time alone with him.

Jabe and Sunny Marion had borne him off with them.

And even Jimmy Hale was nowhere about.

Next day the newspapers all carried the announcement Sunny Marion for whom his people had been named, would become the bride of the world flier, Mont Wallace. Jimmy's pictures of her appeared everywhere and that evening there were pictures of Mont and Sunny before the world flight plane.

It was understood, the cutlives said that the wedding would be postponed till after Mont's Wallace had made another attempt at the non-stop trip around the world.

After that there was nothing much left for Natalie Wade but the job she held and she plunged to it with all the energy she could muster. She wondered a little that she saw nothing of Jimmy outside of working hours.

Jimmy had told her once that he would be waiting for her if things cracked up for her. They would, he said, jump off at a high place together. Maybe that was what he was afraid of now. Maybe he felt that his return to her would bring a mood of desperation to them both.

But she laughed at the thought. She could take defeat, not with equanimity it was true, but she could take it. It was desperate uncertainty that unnerved her.

Mont Wallace and the Marions were deep in plans for the second flight. "Don't need a little rest in that until it was accomplished, for failure made no heroes for the front page. Monty had been a spectacular figure on his return, but only because of his return from the dead. His romance had kept the page open to him for another day, but after that there were more thrilling stories than his own preoccupation with work, his hours spent on the plane and on the revision of the flight organization.

Natalie herself was writing a new series of features and found herself engrossed.

Life was returning to its old round. Even Mack Hanlon was little interested in the story of the new flight attempt.

But at last the day of the take-off came.

The plans had been changed now. The start was to be made from the home airport. New York was only one of the refueling stops. The last leg of the flight would be down the coast from Nome.

Before dawn they were at the field. Jimmy was there with his flashlights going to record the new scene and the altered plane.

"Good luck and success this time, boy," she spoke in a low tone. "I've got a bet right on your nose."

Continued Next Issue

3 packages cream cheese
1 tablespoon prepared mustard
Soak the gelatine in the cold water for 5 minutes. Heat the soup just to the boiling point and dissolve the gelatine in it. Call until the mixture thickens slightly, then fold in the meat and peas. Fold into a wet loaf pan and chill until firm. Whip the cheese with the mustard and a few drops of milk to spreading consistency. Garnish with lettuce, cucumber sugar and stuffed olives. Cucumber cups may be made from the ends of unpeeled cucumbers; scoop out the pulp, and cut five or six petals, cutting almost to the base of the cucumber. In the center of each cup, place a slice of stuffed olive or a round of pimiento.

Hot Biscuits Are Easy, Too

If you'd like hot biscuits to serve with your salad loaf, biscuits may be mixed, cut and placed on pans for baking, before your guests begin to gather. Then they may be baked as usual.

BRAN JELLY BUNS

2 cups flour
4 teaspoons baking powder
1/2 teaspoon salt
1/2 cup shortening
1 cup cooking bran
1/2 cup milk
1/2 cup jelly

Sift flour, baking powder and salt together. Cut in shortening and stir in wheat bran. Add liquid, mixing lightly with a fork. Turn out dough on lightly floured board and knead for 1 minute, then pat to 1/2 inch thickness and cut with biscuit cutter. Make a deep depression in the center of each bun; fill with 1 teaspoon jelly or jam. Place on greased baking sheet and bake at 450 F. for about 15 minutes.

BREAD AND BUTTER CAKE

1 small loaf white bread
1 package lemon flavored gelatin dessert
2 cups boiling water
1/2 teaspoon salt
2 cups apple sauce
1/2 teaspoon cinnamon
1/2 teaspoon nutmeg

Cut bread in thin slices and trim off crusts; butter lightly. Dissolve gelatin in boiling water and add apple sauce. Place thin layer of warm apple mixture in bottom of loaf pan, then layer of bread slices. Sprinkle lightly with cinnamon and nutmeg. Continue with alternate layers of bread and apple sauce.

To serve: turn out on large platter, cut in slices and garnish with whipped cream.

Here's a real buy!

THAT MEANS A BIG SAVING IN MONEY FOR YOU

Homemakers' Exchange

of Helpful Household Hints and Recipes

Conducted by ELEANOR HOWE

To make "Lasses Delights": Mix 1 cup light molasses, 1/2 cup sugar, 1/4 cup melted butter, 1/4 cup shortening, and 1/4 cup boiling water. Then add 2 cups flour sifted with the following: 3 tea-

spoon soda, 1 teaspoon salt, 2 teaspoons cinnamon, 1 teaspoon each nutmeg and cloves. Mix thoroughly. Stir in 1 cup each of raisins and chopped nuts; then add 1 1/2 cups uncooked rolled oats.

Chill thoroughly in air-conditioned ice refrigerator, or store there. Protected by the properly moist, clean-washed air of this modern refrigerator, it will keep fresh and sweet, until needed. Bake as drop cookies in a moderately hot oven (375°) for about 12 minutes. Makes 6 dozen cookies.

The most convenient way to drop dumplings into broth is to first dip a spoon into the broth. Then dip up the dough and it will slide off easily into the broth.

Here is some ammunition for the housewife who is waging a continuous battle with dirt. Add two spray guns to your cleaning equipment. Keep one filled with kerosene and use it to lightly spray the floors, rugs and broom before sweeping up the dust and dirt.

Fill the other gun with furniture oil and spray this on the floors, dry mop and dust cloths.

To make a hot water bottle soft

Here is a recipe that hails from Georgia for "Golem Golem Pie." It will convince you that while "everything is peaches down in Georgia" it is apricots that are the real golden nuggets in this glorious pie.

Line a pie-pan with unbaked pastry. Then place canned apricots, using plenty of them to fill the pie, cut side up, in the pastry-lined pie-pan. Mix 1 cup sugar with 2 tablespoons cornstarch and sprinkle over the apricots. Fill the pie to within 1/2 inch of the top with sweet cream. Bake in a hot oven (450°) for 10 minutes, then reduce heat to a moderate oven (350°) and bake approximately 50 minutes.

Here's a real buy!

THAT MEANS A BIG SAVING IN MONEY FOR YOU

CANADIAN GARDEN SERVICE Gordon Lindsay Smith

Driveways

Where driveway and lawn come together there is often a source of annoyance to the gardener who desires to keep his sward sile and span. If the drives are of cinders, gravel, or crushed stone, car wheels and youngsters will often throw some of this material into the lawn with appalling results on a sharp lawn mower. Then again the grass spreads from lawn into the driveway and weeds travel in the other direction. If driveway and lawn can be rigidly separated with a permanent curb, then much trouble will be averted.

To do this many people are using low hedges or a curb of flag stones sunk deep on edge. If shrubbery is decided upon then any of the species, barberry or other small to medium height shrubs are used and either clipped once a year or allowed to grow naturally. Shrubbery for this purpose is planted about 18 inches to two feet apart, depending upon mature height. It must have good soil and is best watered occasionally during the first season. Sometimes, shrubbery for the first year or two is reinforced by a few strands of heavy wire fastened securely to stout stakes painted brown or green.

Stone Curb and Weed Killers
When stones or brick are used they must be securely anchored in the earth of concrete. Only two inches left above the surface of drive and lawn will be necessary. If higher there will be difficulty in moving close with the lawn mower. Grass of course is grown right up to the edge of the stones. To prevent grass or weeds growing among the gravel or cinders, gardeners are advised to spray with some of the commercial weed killers now available. If not handy gasoline will do the trick. Care must be exercised to keep these killers away from wanted grass, flowers or shrubbery. Another suitable material for weeds or grass in driveways is common salt, the cheaper and coarser the

better. Not only will a liberal application of this about one or two handfuls to the square foot destroy grass, weeds, poison ivy, etc., but it will also bind gravel together into an even surface, keep down dust and repel frost. In some parts of Canada, salt is used on all gravel roads and gives a surface equal to light pavement.

Insects and Diseases

Garden insect enemies are divided into two groups—those that eat holes in the foliage and those that suck out the juices. For the first named, poison is usually applied while the suckers are attacked with a burning spray which penetrates. Often when both are present, a combination of poison and something that burns, such as lime sulphur and arsenate, gives the best results. The damage from the biting insects is usually quite apparent, but the presence of the other kind is only shown at first by a wilting or withering of the foliage. For sucking pests, chief of which are the aphids or plant lice, spray with white oil soap, a quarter pound of soap to a gallon and a half of water; nicotine sulphate or "Black Leaf 40" or any other repellent secured from a reliable seed store.

Fungus

When fungus attacks the plants, the foliage usually turns yellow or brown, or white spots like mildew cover the leaves. Fungus is most common in warm, murky weather. Spraying with Bordeaux Mixture, or dusting with specially finely ground sulphur is advised. Sulphur dust will also protect hollyhocks and phlox from rust, if applied when the disease first shows itself.

Out worms, which eat through newly set out plants at the base of the stem, are poisoned by spreading sweetened bran mixed with Paris green or special mixture about the plants. Where there are only a few plants to protect the same may be provided with paper collars.

Still Time

Even in the warmer sections of Canada it is quite possible to have a splendid garden from a start made in June. As a matter of fact more Canadian gardens are damaged by too early rather than too late operations. Many flowers and vegetables make little growth during the cooler spring weather and very often there is fatal damage from frost. In any case, however, even if the main plantings have been made of flowers and vegetables there are still plenty of things to plant which will come on after the first bloom or first vegetables are over. Experienced gardeners in recent years have been purposely holding back a portion of lettuce, spinach, carrot and other vegetable seeds so that the harvesting season may be extended just that much longer.

Early June is the ideal time in most of Canada to plant seed of those hot weather things like melon, cucumber, medium or late corn and beans. It is not safe in many districts to set out celery, tomato, cabbage and pepper plants much sooner. There is still plenty of time to plant dahlias, gladioli and canna bulbs or corns.

TREE PLANTING CAR GIVES ADVICE ON SHELTER BELTS

Reducing loss of moisture from evaporation, damage from soil drifting, conservation of natural trees and planting shelter belts; beautifying the farm home and grounds are objects of the Canadian Forestry Association's travelling tree planting car. This railway coach equipped with motion picture and lantern slide machines, is touring the prairie provinces for the thirtieth year. This year the car is being financed by the member line elevator companies of the North-West Grain Dealers' Association. Local line elevator agents are sponsors of the car where it makes a stop. The car was donated to the Canadian Forestry Association by the Canadian Pacific Railway and both railways move it from town to town free of charge.

According to A. B. Beaven of the Association, who is travelling with the car for his twelfth year, there is greater interest and enthusiasm shown by rural people than ever before. The car has been out since early March. At the end of May 48 towns had been visited, 18 meetings held, with a total attendance of 17,052 people.

Every afternoon a special program is shown for the school children, and in the evening for adults. A well rounded out program for the school pupils includes several short educational talking movies, with a couple of short comedies. Mr. Beaven's talk on tree planting and planning the farm home grounds is accompanied with movies and lantern slides. The evening program includes films of the same pictures shown in the afternoon but more time is spent on the main subject. Those attending are invited to remain after show to ask any questions concerning tree planting or other related subjects.

It is naturally impossible for the car to visit all prairie towns in one season. However, all those interested may obtain advice from any line elevator agent concerning the car.

The Family DOCTOR

by JOHN JOSEPH GAINES, M.D., F.R.C.P.

PLAIN HORSE-SENSE IN EATING

Sometimes, I can't get away from the good old plan of eating because I am hungry—the best reason on earth isn't it? If you are not hungry—and have no appetite when you should have one—then something may be wrong; better see your doctor—that's what he's for. It may be an easy time to get you right.

Then—I still cling to the ancient plan of eating things that taste good. What's wrong with that? Just why should I be obligated to force down stuff that I despise? Eating is part of my reward for being a good, industrious boy. That applies to you dear reader. If you are a girl, simply change genders in this letter and go ahead. Boys are not so different from girls, when it comes to living and eating.

Those two good old rules—eat because you are hungry, and eat what tastes good. It will take a lot of theory to scare up better ones. But... people get to figuring on "balanced ration," and "calories," and they fuss around about them, with an air of superior learning. First thing you know, you are off on the trail of "vitamines" and then you don't lack much of being in over your head! You get afraid to eat white bread—really the most nutritious, best tasting bread in the world. Are you scared of white bread? One of my contemporaries refers to certain bread alarms as "the vitamin fad." That's not far from right. I've written thousands of words on diet and eating—yes, millions. After all, I believe I feel better by practicing plain horse sense, that tells me not to eat too much—but what I like.

NEWS & VIEWS OF TOWN AND DISTRICT

Considerable real estate is changing hands in town these days. Recently Mr. Tom Lane bought the house where he resides from Mr. W. Loffoot; Joe Brech bought a house on First avenue from Mr. J. Whittle; Cal McKenzie has now purchased the big Laird house on Fourth avenue.

We have private information that no less than three of our most eligible bachelors will be bringing their brides to town next month to settle down.

Mr. and Mrs. M. Woods returned recently from Washington, where they spent the winter months.

***AEE I Said says Creme Corn and Bunton Salves are safe, sure. Remove callouses, warts, ingrown toenails, too. Sold by Wainwright Pharmacy and all drug counters.

We are glad to report that after her very serious illness at the hospital, Mrs. J. Pawling is progressing favorably although not yet able to have visitors.

Mr. Hugh McCrystal is planning to add an addition to his barn on his dairy farm.

Owing to increased business, the Gold Standard refinery are keeping real busy both night and day.

***Just unloading a carload of blacksmith coal from Pennsylvania. Get yours now. Joe Welch.

On Sunday a large number of our townfolk enjoyed the cool breezes and bathing at Clear Lake, but had a hard battle with the mosquitoes which are truly plentiful this year.

Sister Mathilda, who was one of the first of the staff to come to Wainwright convent, and who is so well known to almost everyone through her musical connections, is being transferred to Peterborough, Ontario, and left for the east this week.

The Separate school board will entertain the pupils of their school with the kiddie's parents at a picnic at Mott Lake tomorrow (Thursday) afternoon.

We learn that Miss Dumas, of the hospital nursing staff, is leaving this week for her annual vacation.

***Crop prospects look good! Repair and improve your buildings while lumber is cheap—Joe Welch, Atlas yard, phone 57.

Mayor Middlemass spent the day in the city on Monday on business.

Considerable excitement was caused at the week end when the new big bus for the Edmonton-Wainwright run arrived in town. It is indeed a beautiful conveyance, and matches well with any of the greyhounds which tour the whole North American continent. And "Ken" handles it real well, too.

A very pleasant time was spent by a large number of the members of the W.I. on Tuesday, when they gathered at the farm home of Mrs. J. Chynoweth for the annual "Grandmothers' Day".

The annual picnic held at Gilt Edge Park is being announced to be held there on Wednesday, July 6th next.

A novel sight was witnessed on Monday evening last when we saw Mr. Arthur Harden busy finishing his last year's threshing on the farm 9 miles north of town.

***Sports Day Special at the Theatre—"Nothing Sacred". The gayest, goofiest cast ever seen on stage or screen. Don't miss it.

Make sure that your arrangements are made in lots of time to attend the big Fun-fest on July 1st in Wainwright. A real big time for young and old alike all day long.

Mr. George Madder, of Fabany, is enjoying the driving of his new Terra plane car this week. Pudge Smith also sold a new Hudson sedan to Mr. L. Forgeson last week end.

Mr. Ernie Squires leaves this week to make his home at Victoria on Vancouver Island.

Monday last saw the arrival in town from Calgary of Miss M. Oddy, who will assume the duties at the bank formerly handled by Miss K. Hart, who resigned to enter the nuptial state.

The annual meeting of Hargal Oils Ltd. and British Petroleum Ltd. is being held in Vancouver on June 26th, according to notice to shareholders in this district.

Mr. and Mrs. A. Kay, after a long holiday in Canada, are returning to their home in the Old Country. They were week end guests of Mrs. O. Hannah and Mrs. D. Rattray and spent Sunday at the former's Clear Lake cottage.

After a visit here for the past couple of weeks, owing to the illness of his mother, Mr. Fred Pawling left for his home in Winnipeg on this morning's train.

***Before you leave on your vacation insure your car with Joe Welch.

Quite a large number of golf devotees journeyed to Hardisty on Sunday last to take part in the annual tournament there.

Mr. Baxter and children visited relatives south of Hardisty on Sunday last.

We note that Mr. Don Pawsey, secretary of Vale M.D., was elected to the directorate of the Alberta Municipal Secretaries' Association at the recent convention of that body.

The Legion
Notice Board

Extract from The Financial Post dated June 4, 1938:

Canadian Legion Speaks for National Unity

With national unity becoming increasingly the major Canadian issue of our time, it is stimulating to hear a plea for unified Canadianism from national bodies whose presentations have recently been heard at Ottawa before the Rowell Commission.

The brief but excellent submission of the Canadian Legion, presented last week, sounds a much-needed call to real nationhood. Setting as its primary objective that Canada should be a nation in fact and not merely in name, it outlines half a dozen specific policies which it believes will

"tend to strengthen the national government with the provinces equitably provided for, and thus tend to the development of a nation with Unity as its keynote and high morale as its inspiration and not simply a loosely-knit confederacy." Forces are rampant in Canada at the present time which would break this nation into a Europe of small, bitter principalities, preyed upon by avashbuckling dictators. It is high time the national government and those like the Canadian Legion who stand for a strong united Canada, made their views and voices heard.

We are glad to state that Miss Joyce Lally is progressing nicely following her recent operation at the hospital.

Sympathies are expressed to Mr. Herb Macdonald, who received the sad news of the sudden death of his father who passed away on Saturday evening last while out driving the car with his family. Mr. and Mrs. Macdonald moved over to their parents home upon receipt of the sad news.

Miss Hope Smith is spending a few days with friends in town before returning to her home at Vermilion.

A number of members of the local Masonic lodge were in attendance last week at the annual communication of the Grand Lodge of that order in Edmonton.

A pleasant little tennis tournament was carried out by the local club on Sunday last. As the events are not all finished a full report of the results will appear next week.

Miss Beatrice Carroll, of the telephone exchange staff, spent the week end in the city.

***Little old New York, where back-biting is a pastime and a big laugh on every corner. See "Nothing Sacred" on Sports Day at the Elite.

Mr. and Mrs. Frank Morris made a hurried trip to the city at the week end, where we understand Mrs. Morris is to undergo a serious operation.

Mr. and Mrs. Bradley, former residents here, drove down from Edmonton to visit friends at the week end.

Mr. Chas. Hudson, of Calgary, is now in charge of the speaker station at the C.N.R., in place of Mr. C. MacKenzie who has bid in the Jasper point. Cal expects to be at the mountain station for the next three months.

Having bought a house just recently vacated by Mr. J. Daugherty, Mr. and Mrs. Cal MacKenzie have moved in and are making some alterations to the place.

Mr. H. O. Bompas, of the department of mines and resources, and Mrs. Bompas, who have been visiting Mrs. E. L. Cook for a couple of weeks left for the west coast for a few days, and plan to return to town to stay until July, when they will return to their home in Ottawa.

Last Thursday saw the town looking much brighter by the flying of a large number of flags in honor of the King's birthday.

The bid wind and rain storm last week was a little unpleasant, but the moisture was more than welcome, and assured good growth for the crops and gardens.

***A great many are taking advantage of the paint sale at the Atlas yard, and on account of the late season the company have agreed to extend it till July 1st.

We have been notified that all tickets on sale at bargain fares to Pacific coast points during June, July and August, will bear final return limit of 30 days instead of 16 days as previously advertised.

COMING EVENTS

A sale of home cooking will be held by the United church W.A. at Bruner's showrooms on Saturday next, June 18th, from 3 to 6 p.m. Everything to take to the lake or for your Sunday dinner!
